

The Power of Now

Unlock smarter parking with our latest cutting-edge digital solutions

As parking evolves, so should your technology. FAAC Parking Solutions delivers cutting-edge innovations to streamline operations, boost revenue, and elevate the customer experience with its award-winning product TIBA X60/SPARK.

From ticketless systems to self-serve digital services and mobile payments, discover how we're future-proofing your parking assets and setting a new standard in the industry.

The New Standard in Parking Innovation

From entry to exit, we deliver solutions that enhance the overall parker experience, no matter where they are in their parking journey. Let's explore how each of these advancements can help you achieve a fully digitized, optimized operation. [The consumer journey begins at...](#)

PRE-ARRIVAL ---->

Self-Serve Digital Solutions for Reservations & Subscriptions

What it is: A user-friendly digital platform for managing parking reservations and subscriptions.

Operator Benefits: Reduces administrative burdens, increases customer autonomy, and boosts engagement.

User Benefits: Empowers users with control and convenience, allowing them to manage their parking needs effortlessly.

Pain Relief: Eliminates the need for manual handling and lengthy customer service interactions.

Available on: SPARK Self-Service Platform

ARRIVAL ---->

Automated Credit Card on File Payments

What it is: A system that securely stores credit card information for quick and easy automated payments.

Operator Benefits: Enhances payment efficiency, reduces exit bottlenecks, and minimizes disputes.

User Benefits: Provides a seamless payment process, ensuring a quick exit.

Pain Relief: Solves the problem of payment delays and long queues at exit points.

Available on: SPARK Self-Service Platform

Ticketless Parking

What it is: Remove the need for physical tickets by utilizing the power LPR for seamless entry!

Operator Benefits: Streamlines operations, reduces costs, and enhances throughput.

User Benefits: Provides a faster, more convenient parking experience.

Pain Relief: Solves the issues of ticket misplacement and exit delays.

Available on: X60/SPARK system, featuring a **NEW** TL-60 device created specifically for ticketless locations

Once the consumer enters the garage, their journey continues seamlessly. **EV charging stations** are available for quick, convenient service, while **mobile payments** allow for hassle-free transactions via smartphone. When it's time to leave, the **ticketless exit system** ensures a smooth, fast departure. Throughout, **AI-powered business intelligence** monitors and optimizes every step, enhancing efficiency for operators and satisfaction for users.

DURING STAY ---->

Single Ticket Parking + Charging Solution

What it is:

A single solution that lets users pay for parking and EV charging in one transaction, creating a seamless experience.

Operator Benefits:

Combines parking and charging fees, reduces complexity, and adds a revenue stream, while integrating with existing systems.

User Benefits:

Allows one-step payment for parking and charging, providing a smooth, hassle-free experience.

Pain Relief:

Eliminates separate payments, reducing frustration and streamlining the entire process into a single solution.

Available on: Coming in 2025 for X60/SPARK.

DEPARTURE ---->

Mobile Payments

What it is: A flexible payment solution that allows users to pay via their mobile devices, anywhere, anytime.

Operator Benefits: Enhances payment security, reduces cash handling, and integrates with various parking systems.

User Benefits: Offers convenience, speed, and flexibility in payment options.

Pain Relief: Addresses the inconvenience of cash payments and long payment queues.

Available on ALL Platforms: X60/SPARK

POST-EXPERIENCE

Business Intelligence, powered by SpecifAI

What it is: A comprehensive analytics tool for all your platforms to enhance management and decision-making across your ecommerce portfolios.

Operator Benefits: Improves operational efficiency, maximizes revenue, and enhances strategic planning.

User Benefits: Leads to better service availability and improved user satisfaction.

Pain Relief: Solves the challenges of inefficient resource management and revenue leakage.

Available on: X60/SPARK

SPARK + X60

30+ Years of Parking Expertise,
Now in the Cloud

SPARK is the cloud-based management platform, powered by AWS, built to run on TIBA's X60 and X30 parking systems. Your custom dashboard turns insight into action with real-time, cross-portfolio analytics and controls that impact every facet of your operation.

Streamlined Management

Manage the everyday functions of your business from a platform that goes everywhere you go.

User-friendly Interface

Turn insight into action with the fewest number of clicks.

150+ Reports and Counting

Gain a holistic understanding of your portfolio on a regular basis.

Automatic Updates

Always enjoy access to the latest features and modules.

Simplified IT

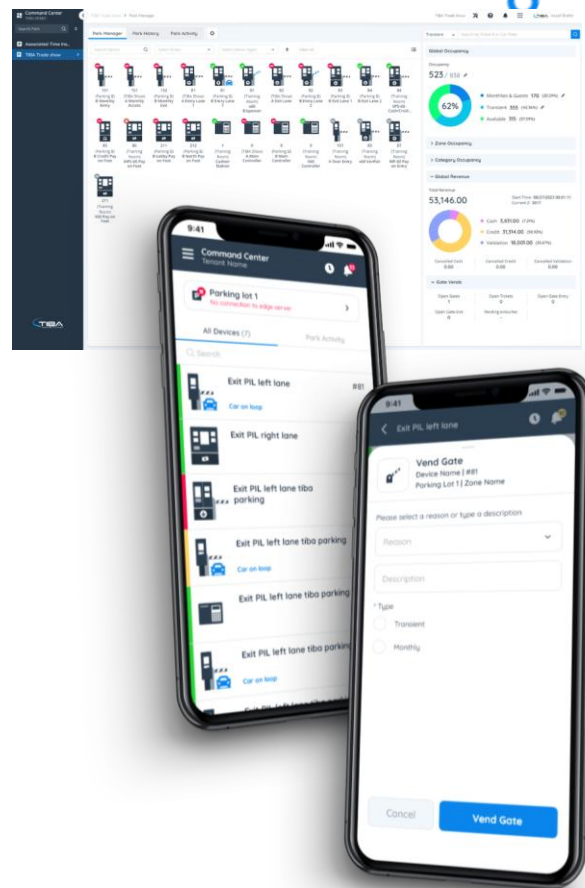

No on-site servers for you to maintain.

Industry-leading Uptime

Take direct actions that keep customers satisfied.

Anytime, Anywhere

24/7 access from your desktop, mobile browser, or SPARK app (Apple and Android).
