WIPARK Parking Garages Vienna

WIPARK Garages GmbH is one of the leading garage operators in Austria. In total, WIPARK owns and manages 60 parking garages in Vienna. In August 2014 WIPARK awarded to SKIDATA the contract to equip four parking garages (Vienna Main Railway Station, B02, and the Manner and Geriatric Center underground car parks) with cutting edge technology. SKIDATA took over the complete project management and delivered the parking solution, together with the entire infrastructure, in a short time.

Project description

Using newly installed QR barcode readers, a variety of voucher or payment solutions can from now on be read, processed, and offered to customers. And even more: Customers can book their parking in advance and enter the garages using the corresponding QR code.

A special comfort is offered to customers with the integration of the Vienna mobility card. Annual public transport cardholders can conveniently use their card to enter into the car parks and, additionally, are granted a discount on the parking fee.

In addition to the SKIDATA components, the entire network technology, including electrical switch cabinets and UPS systems, was

delivered to the garages. Also delivered was the entire intercom including emergency call stations, as well as the ability to transfer operation of the systems to a master control center. As the solution partner, SKIDATA was responsible for the installation, integration and operational start-up of all systems.

To guarantee optimal maintenance of all four systems, WIPARK is taking advantage of the benefits of the SKIDATA.Care Packs for the next 10 years, with an option for 15 years. With this service, for example, updates to the latest software version are automatically installed, which ensures that WIPARK systems are always using state of the art technology.

Facts and Figures

Customer	WIPARK Garagen GmbH
Parking Garages	Vienna Main Railway Station, B02, and the Manner and Geriatric Center underground car parks
Installation Date	September / October 2014
Capacity/Size	in total 1,500 parking spaces
