## LedPark LED Lighting system

Circontrol Intelligent LED lighting solution for indoor car parks is designed to be combined with bay monitoring system that enhance the car park to a new generation of energy savings by adapting the lighting conditions.

You can save up to 65% on your lighting costs with a LedPark

- Up to 60-75% less energy consumption
- Less maintenance (up to 100.000h lifetime)
- Reduced return of investment (ROI)
- Individual lighting management control (by traffic occupation, people access, schedule, events...)
- Fully integrated within the bay monitoring platform (structure and software)
- Real-time and reporting of kWh consumption
- Energy savings lighting (adjustable)
- Security (low voltage 48Vdc)
