Intelligent recharging solutions
for electric vehicles

NEW

TRIO Quick Charger

Circontrol Trio Quick Charger CCL-QPC (compact combined quick charged) combine CHAdeMO (DC 50kW), Combo 2 (DC 50kW) and AC 43kW.

Designed to support dual protocol CHAdeMO and CCS (combo 2) to cover all users needs, making suitable for business and commercial fleets as well as petrol station along the roads.

The compact combined version has been adapted with latest communication protocols OCPP and XML. Circontrol offers an innovative SCADA software for remote control and as a management tool.

Charging operator can friendly access to status information, graphics and charge reports according historical data registered.

Technical Features

User interface

Quick Charging in 15 minutes

8" LCD screen for user interaction

Start, Stop and emergency buttons

Light indications for status

RFID identification and prepayment

Charging management

Mode 3 and mode 4 locking mechanism

Real time energy metering

Time and consumption based prepayment modes

Simultaneous AC & DC charging with maximum demand control

Communications and protocols

Remote control and monitoring of the unit through standard XML & HTML

OCPP protocol integration

Ethernet 10/100BaseTX communication and 3G (Optional)

Security & Protection

IP Rate: IP54

Temperature range -30°C to +45°C

Protection against overloads, short-circuits and insulation faults with an automatic switch

EV standards: IEC 62196-3, IEC 61851-1, CHAdeMO and CCS (combo 2)

OCPP
Open Charge Point Protocol
