

Scan to Pay

Bring app-less, mobile Scan2Pay convenience to traditional ticket facilities without changing your entry/exit controls

A Modern Way to Pay

Parking is going digital, and payments are at the center of this shift. Scan to Pay allows parkers to scan a QR code, view their fee, and complete payment instantly from their phone. With no app to download and no extra steps to slow the process, it provides the speed and simplicity today's consumers demand.

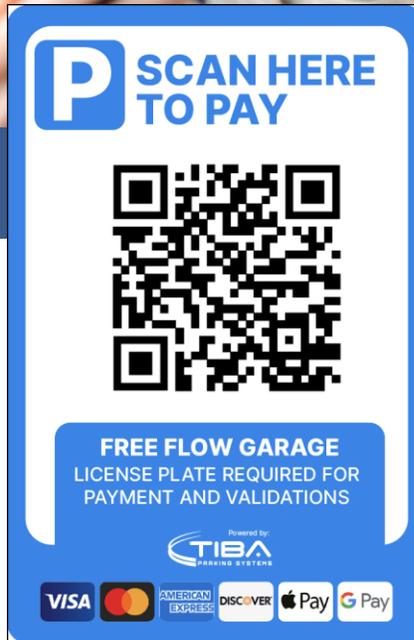

Part of the SPARK Platform

As the latest feature within the SPARK Self-Service Portal, **Scan to Pay** offers a fast, app-free way to link license plates to payment—backed by our **Park & GO (Credit Card on File)** capability.

Whether registering as a **guest** for one-time use or as a **member** for repeat visits, parkers enjoy a seamless, ticketless experience from entry to exit. For operators, it's another flexible, digital tool within the SPARK ecosystem—streamlining workflows and delivering valuable analytics through a single management platform.

Essential for Ticketless and Free Flow

Ticketless and Free Flow parking solutions depend on digital-first payments. Scan to Pay is the cornerstone of these models, enabling smooth exits, digital receipts, and higher throughput without the bottlenecks of traditional payment. It transforms payments from a point of friction into a point of advantage—for both the operator and the parker.

Solution Brief

Why Scan to Pay Now?

- + Aligns with digital-first consumer expectations
- + Lower friction for occasional parkers—no app download required
- + Positions facilities for future growth

Operator Benefits

- + **Critical** to Ticketless and Free Flow adoption
- + **Seamless** integration through SPARK
- + **Lower hardware costs** and stronger operational data

Parker Benefits

- + **Simple:** scan and pay—no app needed
- + **Flexible:** credit card, Apple Pay, Google Pay
- + **Transparent:** easy digital receipts

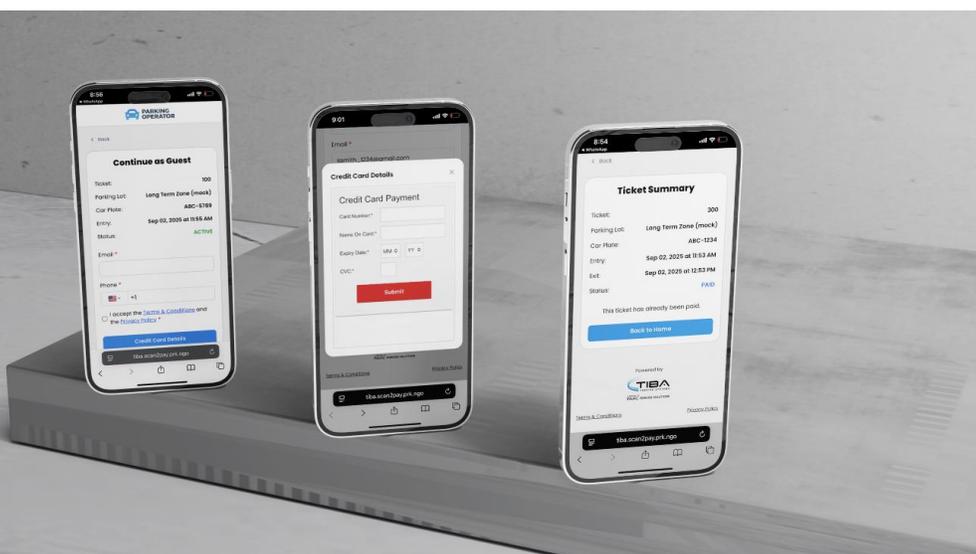

How It Works:

Simplified Steps for Seamless Payments

As the newest addition to the SPARK Self Service Portal, Scan to Pay isn't just an option—it's the essential payment layer for Ticketless and Free Flow. By combining simplicity for drivers with operational efficiency for operators, it anchors the next generation of parking solutions.

Here's how it works:

- 1). Enter** – Driver enters with Ticketless or Free Flow technology; the license plate recognition camera captures the parker's license plate.
- 2). Scan** – QR codes placed on signage connect parkers to payment portal page where they enter their license plate number and preferred form of payment.
- 3). Exit** – License plate is captured upon exit and payment is validated automatically, enabling a smooth departure.
- 4). Confirm** – An option of a digital receipt is available by the parker scanning a QR code upon exit device or via exit signage.
