**Founded in 2014
by Nelly Bussac and Loïc Brenterc'h,
ABA-WORKSHOP is an architecture
practice with an international
multidisciplinary team that
designs innovative, atypical,
mixed use infrastructures.**

The cofounders lived and worked
on different continents before
creating ABA-WORKSHOP.

The ABA approach enhances local
heritage, contextual identity,
bespoke user experience.

Through its unique understanding
of complex and mixed use car park
structures, ABA develops functional and
aesthetic design focused on user comfort

ABA takes human values in
consideration to improve daily lives.

In less than 10 years, ABA has become
specialised in the design of new
construction, change of use and
rehabilitation of over 4,000,000sqm of
facilities to provide more than 100,000
car spaces. ABA-WORKSHOP provides
services from inception to completion.

OUR VALUES

Sustainability
Heritage
Conservation
High standards
Commitment
Research
Innovation

HERITAGE & IDENTITY

ABA ENHANCES LOCAL HERITAGE, CONTEXTUAL IDENTITY, BESPOKE USER EXPERIENCE

OUR VISION

PEDESTRIAN flows, green and smart mobility outline our way to reshape the urban core and design infrastructure for vehicles.

HUMAN SCALE stands at the center of our approach from XS to XL project scales.

CREATING VALUE out of an industrial site or a basement inspires our team.

TECHNICAL SKILLS

FORM FOLLOWS FUNCTION

Our experience and skills enable us to undertake programmes with knowledge of the objectives and constraints to give our design proposals strength, reactivity and relevance.

We integrate different scales of ecosystems, standards and car park operator requirements.
Our understanding of your objectives allows us to rationalise and control the project timeframe,

to allocate time for the development of research and innovation.
