

Yearly parking cost

Expenses for parking in car parks are perceived to be much higher than they are in reality. On average German car drivers are paying a moderate 60 Euro per year for parking in car parks.

Search time

The search for parking space in Germany on average requires 10 minutes, in Italy even fifteen.

Distance

The price drivers are paying for their search for a parking space is surprisingly high: each search ranges over 4.5 km on average

Environment

Each search comes with an environmental impact of 1,3 kilogramme of CO₂ emissions.

Car cost

Covering unnecessary distances searching for a parking space usually amounts up to average costs of € 1.35

Loss of lifetime

As usually two people are sitting in a car, each search for a parking space sums up to twenty to thirty minutes of lifetime consumed.

Unnecessary distances

International polls show 30 % of all car drivers are hunting for parking space in congested city centres. In some city quarters this may result in an annually driven distance by cars equivalent of 14 times the circumference of the earth.

Parking violation

16 Euro is the amount a German car driver annually pays on average for parking violations. With 36 Euro the Danish are heading European league tables.
